

## Technical Product Manager (Temporary FT)

Powerex Corp., the wholly owned energy marketing subsidiary of BC Hydro, currently has an 18-month full-time temporary position for a Technical Product Manager to join our Finance team. We are looking for people who have experience managing Financial and/or IT projects as well as technical expertise to support existing applications which range from in house custom built to vendor based solutions. The successful candidate, as part of the Management Reporting & Planning team, will play an integral role in helping to establish and maintain business analysis process standards and best practices.

### Duties:

- Develop an in-depth understanding of Finance business processes in order to identify business requirements and develop well-aligned business solutions.
- Collect, analyze, document and manage business requirements.
- Required to understand business priorities, prioritize your tasks accordingly, and managing user expectations.
- Perform quality assurance activities, including test planning, test scenarios/scripts and manual testing.
- Collaborate with our Finance team, Business Analysts and Enterprise Architects to maintain effective technology architectures.
- Primarily focused on gaining a deep understanding of Financial reports and systems, documenting user requirements and working closely with the IT team to develop new data frameworks.

### Qualifications:

- 3+ years of technical product/project management with a proven track record participating in software development projects and end-to-end project management lifecycle experience.
- Minimum requirement of a Bachelor's degree in Computer Science, Computer/Software Engineering, Management Information Systems, or equivalent combination of education/experience.
- Strong business acumen and understanding of IT processes are required.
- Experience with an Agile environment and working with the Business Analysts and development team through design, development, testing and deployment.
- Experience working with a Financial team, applying technical expertise in improving application health is desirable.
- Detail oriented and deadline focused with respect to implementing the product roadmap.
- Strong SQL skills (PSQL/T-SQL) for data querying, data mining and data validation/testing.
- Experience with tools such as Tableau, SSRS, Power BI or other visualization and analysis tools.
- Excellent analytical and problem solving skills.
- Excellent written and oral communication skills.
- Excellent leadership and interpersonal skills.
- Ability to stay organized with minimal supervision in an environment where you will have multiple tasks, tight deadlines, and changing priorities.
- Self-starter who thrives in a dynamic work environment and has a demonstrated attitude of customer service, accountability, integrity and teamwork.
- Product Management and/or Project Management certifications are an asset.
- Experience and/or courses related to the energy markets are desirable but not essential.

**Other:**

- Full-time, 18 Month Temporary
- Must be allowed to work in Canada
- Core business hours are 9 am to 3 pm with people starting earlier or leaving later for to complete a 40 hour work week
- Working from home is not available

**What We Offer:**

For the right individual, we offer a high energy environment, a fun and highly talented team, and a competitive total compensation package. We offer that “something different” to fulfill your sense of drive and exercise your intellect. If you are self-motivated and “able to make things happen,” and demonstrate strong interpersonal, technical and analytical abilities, we want to hear from you!

**How to Apply:**

Interested candidates should submit a CV and cover letter to [hr@powerex.com](mailto:hr@powerex.com). Please Note: Only those candidates chosen for an interview will be contacted.
